- Huge usable surface 48.25" x 28"
- Extra long 27.5" wide x 60" long self storing loading ramp for *loading & unloading easier*
- Black powder coat finish
- 5 carrying handles for *easier installation / removal*
- Leveler bolt and anti-wobble collar included
- Heavy duty extra thick steel mesh surface
- 1 year warranty!

The SC500 features an integrated 2 section ramp which folds up and out into 3 different positions. The first position keeps the ramp folded flat to the carrier surface and held down with a spring pull pin. The folded flat position is to keep the ramp self stored and secured when the carrier is folded up. The second ramp position allows the ramp to stand up straight when a mobility device or equipment is on the carrier. The ramp is held vertically in place with a spring pull pin. The last position is the ramp unfolded. This position allows for scooters, power wheelchairs, and just about anything with wheels to be pushed or powered up the ramp.

A welded handle featured on the ramp allows for easy folding and unfolding. Tie down straps can be hooked onto any of the 10 tie down holes featured on the 4 1/4" tall sides. The rear of the carrier has 2 reflectors for greater visibility at night.

Supporting the carrier is the heavy duty 2" hitch tube which features 4 bolts and a safety pin underneath to allow the hitch tube to be removed from the carrier. The hitch tube has a 5/8" hitch pin hole for securing the carrier to your vehicle and will work on class III or IV hitches. This carrier is not recommended for 1 1/4" hitches.

Please Note: Mobility devices are not to be occupied when loading, unloading, or on the carrier! Never exceed the rated capacities of your hitch.

Weight Capacity	500 lbs
Usable Dimensions	48.25 x 28
Weight	84 lbs
Maximum equipment width	27 inches
Tie down points	10
Distance from hitch pin hole to carrier, folded	4.75 inches
Distance from hitch pin hole to carrier, unfolded	13.875 inches
